GEBERIT BUTTONS FOR CONCEALED CISTERNS

DESIGN MEETS FUNCTION

→ [Geberit button selector](#)

Perfect form meets perfect function

Buttons are the only thing the user gets to see of a concealed sanitary installation and the cistern itself. Geberit buttons don't just look great, they also feature versatile functions. With its different design lines, materials, colours and surface finishes, Geberit perfectly combines good design and reliable function.

Design flexibility

Working in partnership with leading designers, Geberit's range of stylish button designs and finishes ensure there is a high quality design option for all contemporary bathroom styles. Geberit buttons combine intelligent function with convenience, ensuring a heightened sense of freshness and cleanliness in the bathroom:

- Touchless toilet flush
- Surface-even button finish
- Remote flush actuations to be placed anywhere, affording you maximum flexibility

Everything with a system – Geberit flushing systems

Geberit provides reliable, discreet behind-the-wall solutions that ensure perfect functionality, outstanding convenience and maximum durability. The buttons are the only visible elements of a concealed cistern. A variety of flushing systems are available, making it possible to find the right product for almost any application. To make it easier to match up the Geberit buttons with the appropriate cisterns, they are each given a "family name" that they share with the cisterns: Sigma, Omega or Kappa.

Sigma80 - For the highest demands

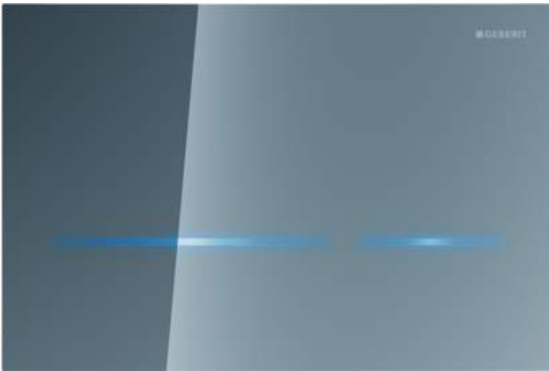

- Touchless glass plate with light fields
- Operation by the wave of a hand over the button LED lights (full or half flush)
- LED lights can be programmed for sensor activated ambient light
- The button allows an 'always on' or 'always off' mode light mode and the ability to change between five led colour options

Sigma70 - Our lightest touch flush activation

- Thanks to the soft-touch buttons, all it takes is a gentle touch to create an exceptionally quiet flush – ensuring that everyone can stay sleeping peacefully.
- A slim plate made of glass or stainless steel, floating mere millimetres from the wall, without any buttons or knobs.

Sigma20 - A touch of fun

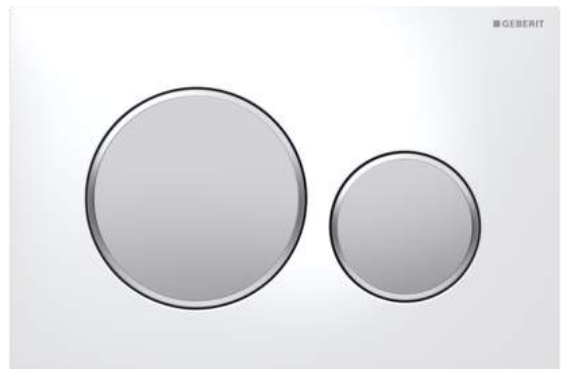

- Sigma20 flush plates bring a bit of whimsy to your bathroom with their simple, geometric look.
- A straightforward visual metaphor - small button for liquids, large button for solids - makes them easy to use, even if you've never seen a flush plate before.

Sigma01 - Design comes full circle

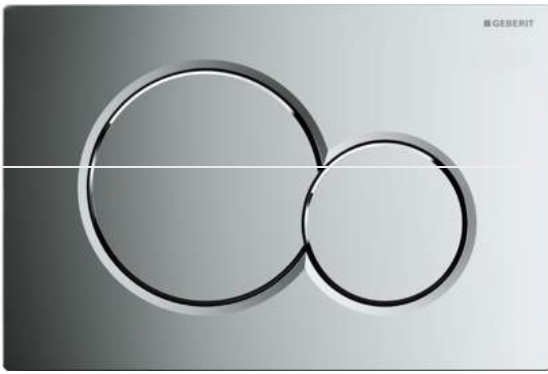

- Inspired by the interplay of droplets of water, the Sigma01 range of interlocking circles is understated and elegant.

Sigma round remotes*

- These round dual flush buttons are the functional option when the bathroom design prevents the cistern from being located directly behind the toilet. They can be placed inwall up to 2 metres from the cistern.
- *Cistern cannot be serviced through remote buttons. separate service access required for the cistern

→ [Sigma round remote 2D CAD files \(.dwg and .dxf\) \(/local-media/cad/sigma-round-remote-2dcad.zip\)](http://localhost/local-media/cad/sigma-round-remote-2dcad.zip)
