

GEBERIT INLET AND OUTLET VALVES

SMALL CHANGE, GREAT EFFECT

→ [Geberit inlet/outlet valves](#)

The valve for all circumstances

There is no need to replace older exposed cisterns just because an inlet or outlet valve is defective. After all, there are appropriate Geberit inlet and outlet valve systems not only for every older Geberit concealed cistern manufactured since 1964, but also for exposed or other cisterns from numerous manufacturers of ceramic appliances.

For every older Geberit concealed cistern manufactured since 1964, there is a suitable conversion set for converting from a single flush to a stop-and-go flush or dual flush (1978 and newer).

Save water immediately

The conversion to the new, water-saving technology can be finished in no time. A family of four could save 20,000 liters of water per year compared to an old single flush system. The replacement work can be carried out without producing dirt or noise for the customer.

Flush valves are available in specialist dealerships

■ GEBERIT AU
 Suitable Geberit inlet and outlet valves for most cisterns can be found at your local plumbing equipment suppliers.
